The Practical and Versatile Choice

The Practical and Versatile Choice

In today's fast paced business environments, we are always looking for ways to get the job done quickly and simply while maintaining integrity every step of the way. When it comes to your mail processing needs, the Quadient IN-600 Series with NeoShip delivers practical solutions that offer maximum versatility.

Available in two models, the IN-600 HF and IN-600 AF are built to move your mail with the highest level of efficiency. With the IN-600 Series, you have access to a growing suite of services and apps to improve postal, parcel and related digital communications.

The contemporary design of the IN-600 Series depicts clean lines and bold edges while maintaining the Quadient commitment to build and ship products in the most ecological manner.

Optimizing Efficiency

The IN-600 HF offers a power-assisted hand feeder/moistener combination and processes up to 75 lpm. All other components of the mailing system are shared with the IN-600 AF system.

Coupled with NeoShip online shipping software, the IN-600 Series is the simple, powerful choice for all of your mailing and shipping needs.

As an option for the IN-600 Series, NeoShip meets the latest USPS® IM®pb (Intelligent Mail® Package Barcode) requirements. Simple to use, NeoShip software is accessible through your MyQuadient online account. With NeoShip you will benefit from:

- Automatically qualifying for Commercial Base Pricing
- Creating IM®pb-compliant shipping labels in minutes
- Free address correction services
- Free insurance Priority Mail® (up to \$50 value) and Priority Mail Express™ (up to \$100 value)
- Consolidated views of all shipments
- Generating detailed reports based on shipment history/operator shipments/transactions

Environmental Commitment

The IN-600 Series carries Quadient's Eco-Label which aims to provide a clear and consistent set of environmental performance criteria used in the design phase of our products.

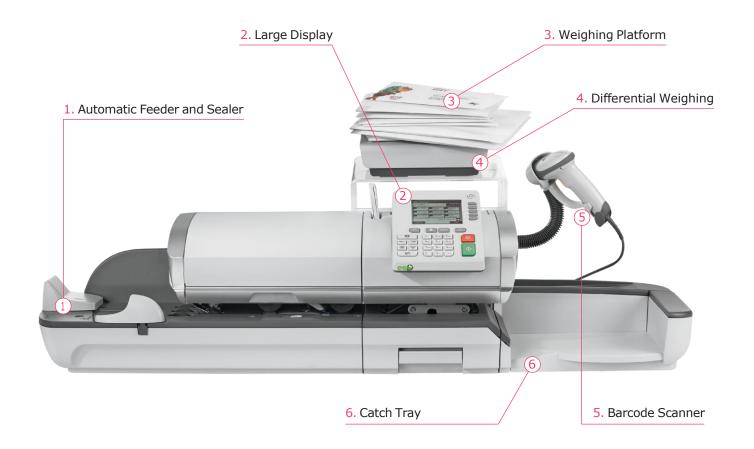

How We Reduce Our Environmental Footprint:

- Quadient limits the machine weight and the amount of raw materials used for production.
- The volume of our packaging is kept to a minimum and is 100% cardboard and recyclable.
- Packaging for the IN-600 Series represents less than 20% of the total weight of the packed product.
- The user-friendly sleep mode helps reduce energy consumption.
- We develop our products to ensure a minimum recyclability rate of 75%.

The IN-600 Series is compliant with environmental Regulations and ENERGY STAR

Innovation Driven by Experience

1. Automatic Feeder and Sealer Processes items at speeds up to 110 lpm.

4. Differential Weighing

Reduces manual processing and handling. With differential weighing, the exact postage value is calculated every time an item is removed from the scale.

Large Display

Navigation is a breeze with descriptive prompts, menus and buttons. The Rate Wizard provides step-by-step instructions, making USPS® rate selection simple.

5. Barcode Scanner

Save time and eliminate errors using a barcode scanner for department/account entry and processing USPS Extra Services.

3. Weighing Platform

5, 10, 30 or 70 lb. platforms handle even the heaviest parcels of oversized packages with ease.

6. Catch Tray

From postcards to 10" x 13" envelopes, this expandable tray holds a variety of items.
